

- Recessed unit with backlighting displays photographic transparency
- Provides a positive distraction for patients
- Hinged frame makes bulb changes easy
- Available in 2 sizes and 4 finishes
- Wide selection of artwork available

Lightbox

Small and Large

The Lightbox is recessed into the wall with a backlit photographic nature scene transparency. A hinged frame allows artwork and T5-type lamps (included) to be easily changed as needed. There is a wide selection of stock artwork available. The lightbox is UL listed, has a continuous gasket to prevent light leakage and comes with a universal (120V/277V) ballast.

**Drawings not to scale.*

Order number: LB01-??-00-00
