

Overbed Canopy

- Provides a positive distraction for patients
- Ceiling-mounted unit with air diffuser and exam lights
- Reading lights available at head of unit
- Patient controls lighting

Overbed Canopy

The Overbed Canopy is ceiling mounted directly over the patient bed. The unit includes an air diffuser, a framed 24" x 48" backlit photographic transparency and seven exam lights. The transparency can be patient controlled by an available pillow switch (PS01). Standard light bulbs included. Reading lights are available at additional cost. Canopy shell color is Sand Speckle.

The recommended minimum ceiling height for canopy installation is 8'-8".

*U.S. Patent Nos. 6,443,591 and D437,070

*Drawings not to scale.

Order number: OC01-??-??-00
