## In-Room Task Center

- 1-piece shell construction features an integral sink, overflow and countertop
- Very easy to clean and maintain – non-porous surface and radius inside corners
- Electric sensor faucet
- Upper casework features a whiteboard, memo holder and glove dispensers
- Lower casework has compartment for waste container and plumbing access door

# Nurse Station

The Nurse Station is an in-room nursing task center. The 1-piece shell construction features an integral sink, overflow and countertop. It is very easy to clean and maintain because of its non-porous surface and radius inside corners. Dome lights and a provision for a light switch are included. An electric sensor faucet, p-trap and strainer are standard. Mixing valve supplied by owner. Shell color is Biscuit.

The upper casework features a white board, memo holder and glove dispensers. Space is also provided for owner-supplied soap and paper towel dispensers.

The lower casework has a compartment for a waste container and plumbing access door, a section with drawers and a section with adjustable shelves. Unit is ANSI Z124.3 compliant. It has a backside fire rating of "A" and a flame spread of less than 25.
